

Marine EM Reference Database

<http://marineemlab.ucsd.edu/~kkey/MarineEM>

Kerry Key
Scripps Institution of Oceanography
kkey@ucsd.edu

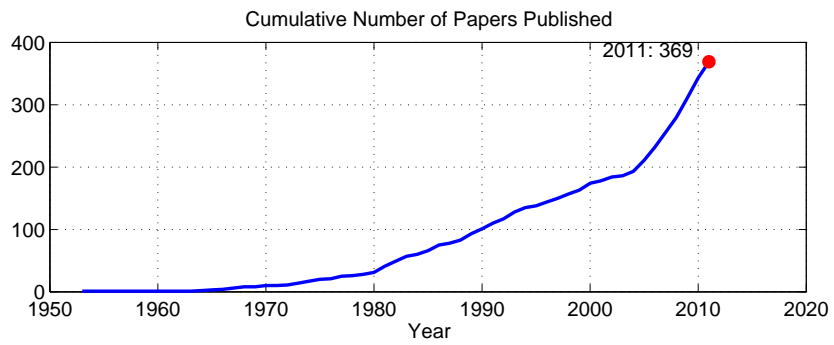

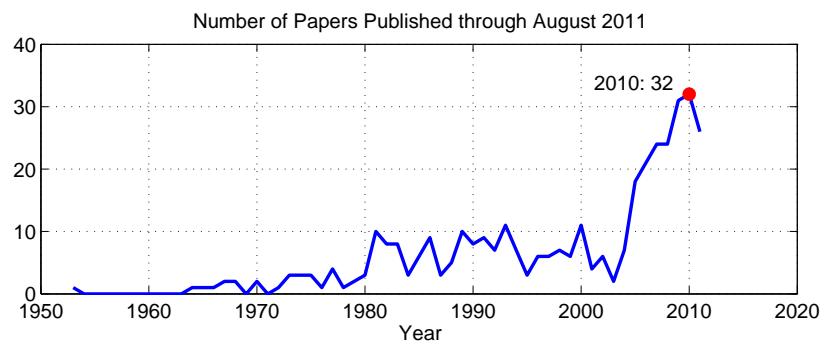

Last Updated:

August 18, 2011

This reference database is intended to document the peer-reviewed published papers that cover any aspect of marine electromagnetic induction for mapping seafloor electrical conductivity. The database also includes student PhD and Masters theses, technical reports, and a few non-peer reviewed publications that represent seminal advances in marine EM. I started this database as part of a review paper that was presented at the 20th EM Induction Workshop, held in Giza Egypt during September 2010. The review paper is now available online:

Key, K. (2011), Marine Electromagnetic Studies of Seafloor Resources and Tectonics, Surveys in Geophysics.
<http://www.springerlink.com/content/y7258505p4610420/>

The database is almost certainly incomplete; my apologies if your own work has been omitted. It is my intention to continually update the database, so if you find missing works or mistakes, drop me a line and I'll update the database asap.
